DETAILED ACTION

1. This office action is in response to preliminary amendment filed on 1/31/05. Claims 1 – 12 have been canceled. Claims 13 – 18 have been added. Claims 13 – 18 are pending on this application.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Benoit Castel (Reg. No. 35041) on 1/30/06.

The application has been amended as follows:

Claim 18, on line 12 of the claim, changes "a" to - - said - -

Allowable Subject Matter

4. Claims 13 - 18 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1 and 15, in addition to other elements in each respective claim, the prior art considered individual or in combination, fails to fairly show or suggest a method of converting analog signals into binary of data comprising: generating a transition pulse when the analog input signal reaches said predetermined threshold value, without circuit switching at the input or the output until that moment, subtracting from the input signal the fraction thereof that corresponds to said predetermined threshold, and asynchronously reset said capacitor and star new switching cycle.

With respect to claims 17 and 18, in addition to other elements in each respective claim, the prior art considered individual or in combination, fails to fairly show or suggest an analog to digital converter comprising: digital means for generating a transition pulse when the analog reaches said predetermined threshold value, digital control means to monitor the occurrence of each transition pulse and command said switching means, and counting means to generating a digital data stream corresponding to the digital value of the analog input signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
